

Happy New Year!

Following are our best Tools, Hacks and Case-Studies from the last month, and some special content just for you, so lets dive in!

Hacks & Methods

Guide of the Month

[Searching Like A Master - Advance Search Engines And Methods](#)

How to search the web like a master using search engines advance operators, special and advanced search engines, and some search concepts for conducting skilled Webint or OSINT investigation.

OSINT & WEBINT Hacks

- [How to find a person behind an Email](#)
- [Using OSINT to Discover New Leads on Tiktok](#)
- [How to search for companies by location on LinkedIn](#)
- [How to Investigate a Company's Website and who's behind it](#)
- [How to find a company's legal business name](#)

Recommended Tools

OSINT Tools Lists

- [OSINT Geoint](#)- Tools related to geographic research and similar issues. Information on locations, street cameras, vessel traffic and planes and much more!
- [OSINT4ALL](#) - Many OSINT tools by category or topic
- [Top 10 Browser Extensions for Hackers & OSINT Researchers](#)- 10 Recommended extensions for OSINT Work. Anonymous browsing, video downloading, screenshots, exif, web analytics and more.

Google Sheets Add-ons

- [MonkeyLearn](#)- Google Sheets add-on, including sentiment analysis, topic detection, and keyword extraction models, and create your own AI models via a simple user interface – no code needed.
- [Linkedin Prospector](#)-The Prospector enables you to easily find LinkedIn leads based on 1. Prospecting – A list of titles and company names. 2. Profile match – A list of your leads Name, Company and/or title on LinkedIn.
- [Twitter Profiles Search](#)- Twitter Handle & Profile search enables you to easily find Twitter user profile links based on a list of prospects.

Domain Owner Research

- [Carbon Dating The Web](#)- Estimate the creation date of a particular site. It basically looks for when the site first appeared in various databases like waybackmachine, twitter, google and more and formulates an approximate date.
- [crt.sh](#)- Enter an Identity (Domain Name, Organization Name, etc), a Certificate Fingerprint (SHA-1 or SHA-256), or a crt.sh ID. crt.sh will retrieve all connected certificates. You can also use the advanced search for more targeted search.

- [Robotx](#)- Uses various sources to gather public information about IP numbers, domain names, host names, Autonomous systems, routes etc. It then indexes the data in a big database and provide free access to the data.

Market Researcher

Automatically scan various sources for Company Details, Person Contacts, Social Analysis, Market Trends and more!

[Add to Chrome](#)

Case Studies

- An excellent overview of tools and methods for Bitcoin research and financial activity done through it. How to analyze transactions, find wallets and addresses and understand if any of them are related to various scams.

[The article](#)

- Niche but interesting, a brief overview of symbols, patches and terminology of motorcycle gangs in the world.

[The article](#)

- Very nice Case Study about a man who decided to roll back a man who tried to make him a Nigerian prince style phishing. He forged a character for himself, and "collaborate" with the crook, until in the end he also worked on him being from Interpol and is now embroiled in an investigation against Boko Haram.

[The Case Study](#)
