### Guide of the Month

### Domain Research – Website Insights

When you're browsing the web for business or pleasure, you might want to know what's behind the site you're on. You might want to know who owns the domain, where that site was registered, if it's connected to others or if it's even safe to access. Some information is easy to access, and some not so much. If you want to dive into the nitty-gritty part of domains and websites you'll need the proper tools and guides.

In this guide, we'll explore all the options for a great OSINT investigation of websites and domains, using a collection of tools we've gathered from across the internet.

## Case Studies

- [OSINT investigations on Spotify](#)  
During OSINT investigations, we sometimes have to think outside of the box. Not every subject has an account on major social media platforms such as Facebook, LinkedIn, and Instagram. In those cases, it can be useful to consider other, less obvious platforms. A platform like **Spotify**, for example.
- [In this case study](#) learn about Google Dorking, which is an OSINT technique that takes advantage of the Google Search engine with advanced search

strings. (video)

- [In this case study](#), learn various OSINT techniques such as analyzing cryptocurrency wallet activity and extract info from the dark web. (video)
