### Guide of the Month

## 14 Leading Information Sources For Renewable Energy Sector Research

To establish a significant advantage over other traders, whether in stock trading, ETFs, or other assets we need to develop a deep understanding of the sector in which we trade. Of course, conducting high-quality research requires high-quality sources. In addition, using the right sources of information will save us valuable time, and allow us to gain a deep and comprehensive understanding of the field quickly and efficiently.

The Renewable Energy sector has emerged in recent years and is expected to continue growing due to climate change, electric vehicles, and ever-growing markets. Following are some leading sources for Renewable Energy sector research and learning.

### OSINT & WEBINT Hacks

## Announcements

- We have recently added two new features to our research tool '[Tradint.io](#)', "Analyst Ratings Finder" & "Hedge Funds & Institutional Holdings Finder". You can also gain valuable insights using our 'Hubs' (we currently have information on Algo trading, Crypto, Retail and Renewable Energy).
- Check out our up-to-date [Tradint.io blog](#) for tips, tools, and analysis of markets and stocks with a Tradint mindset.
- We have a new '[Tradint](#)' course which is currently in [Hebrew](#), we will update you regarding the English version.
- Join the Tradint Subreddit <https://www.reddit.com/r/Tradint/>, find us on Twitter [@TradeTradint](#) & our Facebook page <https://www.facebook.com/TradintMaster> as well as our Webintmaster social media platforms on Twitter [@MasterWebint](#) and our Facebook page <https://www.facebook.com/webintmaster>

## Recommended Tools

### CHROME EXTENSIONS - Web Monitoring

- [Distill Web Monitor](#) A page monitoring tool that alerts you to changes on a web page.
- [Feedly](#)  
An alternative to Inoreader. Use it to add websites to your Feedly dashboard, save them for later, e-mail them to your contacts, and more.
- [RSS Reader Extension \(by Inoreader\)](#)  
A popular RSS aggregator. Among other things, it lets you subscribe to RSS

feeds, save pages while you browse, informs you when feeds are detected on the specific page you are on, and lets you know how many unread items you have in your Inoreader dashboard.

## Username Check

- [goFindWho](#)  
Find people free by phone, name, email, and username on Facebook and in public records. Conduct an online privacy check to see what websites know about you.
- [Username search tool - Aware Online](#)  
With these custom tools, you can effectively research usernames.
- [Sherlock](#)  
Hunt down social media accounts by username across social networks.

## Researching Leaks

- [WikiLeaks](#)  
WikiLeaks specializes in the analysis and publication of large datasets of censored or otherwise restricted official materials involving war, spying, and corruption.
- [OCCRP - Organized Crime and Corruption Reporting Project](#)  
OCCRP provides media outlets and journalists with a range of critical resources and tools including digital and physical security and allows those covering the most sensitive topics to work in teams with trusted editors.
- [DataBreaches.net](#)  
This site is a combination of news aggregation, investigative reporting, and commentary.

## Tradint.io

Conduct a full-scale Tradint (Trade Intelligence) research using the best tools and methods, all from 1 place!

[Check it out](#)

## Case Studies

- [Why OSINT tools are not always the solution](#)

Often when we give a tip on social media to manually download data from the internet, we get the an comment that we can also use an OSINT tool. Of course we are often aware of the lots of tools, but we think that using OSINT tools is not always the best solution. In this blog we give multiple reasons why the use of OSINT tools from third parties should be carefully considered.

**Why would you want to use OSINT tools?**

If you have read the above, you may be wondering when you can use OSINT tools. An important reason may be that you cannot do certain things without a tool. Consider, for example, a tool that analyzes and visualizes large amounts of data, something that you would not be able to do manually (or much more difficult). Another reason is that using tools can save you a lot of time, because you don't have to go through manual steps over and over again. Please always consider whether or not the use of a tool is desirable or not.

- [Google Strings vs. Boolean Strings](#)

Practical advanced Google search is no longer Boolean. It has eventually become such a mismatch in terminology. Most people in our industry refer to search strings on Google as "Boolean Strings". However, the term "Boolean", meaning AND, OR, and NOT, no longer applies to Google search best practices, and less so every day. Practical Google search strings do not use ORs and rarely use the minus –.

- [Weekly OSINT | Terrorism | Extremism Tweets](#)

A weekly digest of Tweets relating to #OSINT (open source intelligence), terrorism, and extremism, curated by Loránd Bodó.
