We at WebintMaster greatly appreciate your joining our community! We would like to hear your input regarding this newsletter, our website, and social media platforms. Following are our best Tools, Hacks, and Case-Studies from this past month. We also included some special content just for you, enjoy!

Guide of the Month

Israel-Post Phishing Scam Exposed – A Simple Webint Case Study

An investigation of an SMS phishing campaign that traps many Israelis by impersonating the postal service website and requesting credit card information. Based on our research, we've found a Palestinian couple that is probably responsible for the scam. In our research, we used a number of tools and methods and found other sites used by scammers.

Announcements

- We recently solved a big phishing scam in Israel using everyday OSINT techniques. [Here](#) is our report & findings!
- We have recently added two new features to our research tool '[Tradint.io](#)', "Analyst Ratings Finder" & "Hedge Funds & Institutional Holdings Finder". You can also gain valuable insights using our 'Hubs' (we currently have information on Algo trading, Crypto, Retail and Renewable Energy).
- Check out our up-to-date [Tradint.io blog](#) for tips, tools, and analysis of markets and stocks with a Tradint mindset.
- Join the Tradint Subreddit <https://www.reddit.com/r/Tradint/>, find us on Twitter [@TradeTradint](#) & our Facebook page <https://www.facebook.com/TradintMaster> as well as our Webintmaster social media platforms on Twitter [@MasterWebint](#) and our Facebook page <https://www.facebook.com/webintmaster>

Recommended Tools

Code Search

- [Android Code Search](#)
A public code search tool for exploring code without downloading the source.
- [Google Code Search - Archive](#)
The Google Code Archive contains the data found on the Google Code Project Hosting Service, which was turned down in early 2016.
- [Google open source](#)
By being open and freely available, Google open-source enables and encourages collaboration and the development of technology, solving real-world problems.
- [Chromium Code Search](#)
A safer, faster, and more stable web browser.

Secure Browsers

- [Brave](#)
Brave is on a mission to fix the web by giving users a safer, faster and better browsing experience while growing support for content creators through a new attention-based ecosystem of rewards.
- [Avast Secure Browser](#)
Browse, shop, and bank safely on any website.
- [Citrix Secure Browser](#)
Secure web browsing—without limiting access. This cloud-hosted browser lets you thoroughly protect your network—without complicating the experience for users.

Ads, Tracking, and Script Blockers

- [AdblockPlus](#)
Adblock Plus is a free extension that allows you to customize your web experience. You can block annoying ads, disable tracking, and lots more. It's available for all major desktop browsers and for your mobile devices. Adblock Plus is an open-source project licensed under GPLv3 and subject to its Terms of Use.
- [DuckDuckGo Privacy Essentials](#)
Simple and seamless privacy protection for your browser. Their privacy essentials seamlessly help prevent your personal information from being exposed during everyday online activity.
- [Do Not Track Me Google](#)
Removes the annoying link-conversion at Google Search/maps/...

This extension gets rid of Google's ugly (tracking) URL. This speeds up loading search results and allows you to normally copy links.

As of version 4.23 (January 2021), link tracking via the "ping" attribute is disabled by default. This prevents Google from tracking your link clicks. If you want Google to track your link clicks, visit the options page to disable this feature.

Tradint.io

Conduct a full-scale Tradint (Trade Intelligence) research using the best tools and methods, all from 1 place!

Case Studies

- [CYBERSECURITY: OUR DIGITAL ANCHOR - A EUROPEAN PERSPECTIVE](#)

The Report Cybersecurity – Our Digital Anchor brings together research from different disciplinary fields of the Joint Research Centre (JRC), the European Commission's science and knowledge service. It provides multidimensional insights into the growth of cybersecurity over the last 40 years, identifying weaknesses in the current digital evolution and their impacts on European citizens and industry. The report also sets out the elements that potentially could be used to shape a brighter and more secure future for Europe's digital society, taking into account the new cybersecurity challenges triggered by the COVID-19 crisis.

- [Panel: Validating Evidence for Courtroom Testimony](#)

Mobile forensics is a complex field that is ever-changing. With the amount of data recovered from each device, the plethora of tools available, and the lack of time we experience as investigators, understanding when and how to validate forensic artifacts recovered from mobile devices is necessary. In this panel, experts from the field will discuss their recommendations for when verification and validation are needed. When is it acceptable to use more than one tool for an answer and when do you have to create test data or dive deeper? When you put your name on a report, you want to be able to stand

behind it with confidence. We are here to help with that.

- [EXCLUSIVE: Logically Identifies GhostEzra, Florida Man Behind World's 'Largest Antisemitic Internet Forum'](#)

Logically, as part of our mission to understand and counter harmful online misinformation, conducts continuous research into the networks, channels, and actors that play an outsized role in spreading misinformation and conspiracies. One element of that research program is working to uncover the identities of those who leverage online anonymity to avoid accountability for spreading misinformation and hate speech. GhostEzra is the most extreme, and arguably the most influential such figure that the investigative team has uncovered to date.
